

Nitesh Singh

Front End Developer – React JS

+91 8460506927 | itsnitesh01@gmail.com | Surat, Gujarat | <https://niteshsingh-portfolio.netlify.app> | <https://www.linkedin.com/in/nitesh-singh-647866239>

Career Objective

To secure a **Frontend Developer** role where I can apply my **2+** years of experience in building responsive and scalable web applications using React.js, JavaScript, and modern frontend technologies, while continuing to grow my expertise and contribute to impactful projects.

Education

K. J. Institute of Engineering and Technology

Bachelor of Engineering

Jul 2020 - May 2023

Government Polytechnic Gandhinagar

Diploma Engineering

Aug 2013 - Jun 2016

Technical Skills

Languages : HTML, CSS, SCSS, JavaScript, TypeScript, Python.

Framework & Libraries : React.js, Next.js, Redux Toolkit, jQuery, Bootstrap, Tailwind CSS.

CI/CD & Version Control : Git, Github

Low-Code/No-Code Tools : Webflow, Wix Studio

Code Reviewer : ESLint, Husky

IDE's : Visual Studio Code, IntelliJ IDEA, Eclipse

Work Experience

React JS Developer - Full Time

Softieons Technology

June 2024 - May 2025

Surat - Gujarat

- Built and maintained scalable, component-based front ends using **ReactJS**, **NextJS** ensuring code reusability and modularity.
- Translated Figma/Sketch/Adobe XD designs into pixel-perfect HTML/CSS using **Bootstrap** for layout and styling.
- Integrated RESTful APIs and handled asynchronous data flow with **JavaScript** (ES6+) and React hooks.
- Ensured cross-browser and cross-device compatibility, including performance optimization for mobile-first experiences.
- Collaborated closely with product managers, backend developers, and designers to define project scope and features.
- Minimized page load time by optimizing images, lazy loading components, and using

code-splitting in React.

- Participated in daily stand-ups, sprint reviews, and retrospectives to align with team goals and client expectations.
- Deployed frontend applications to Hostinger and cPanel for domain setup and file management.

Front End Developer - Full Time
Solwin Infotech

Feb 2023 - May 2024
Surat - Gujarat

- Collaborated with a cross-functional development team to build and maintain **web applications** using **React.js**, focusing on reusable components and scalable architecture.
- Participated in Agile, cross-functional teams to gather design requirements, develop features, and support testing processes.
- Integrated RESTful APIs for dynamic data handling in a project management tool, managing full CRUD operations for tasks, projects, and user activities.
- Created a custom interactive project timeline chart using timer data, visualizing task durations and project progress with Chart.js and Apex Charts.
- Implemented **fully responsive** designs for desktop, tablet, and mobile views using media queries and Bootstrap grid system.
- Resolved cross-browser and device-specific issues to maintain consistent look and feel.

Projects

DRBWC – Advanced Massage Chairs & Wellness Equipment

Tech Stack - HTML, SCSS, Bootstrap 5.3, React JS, Node JS, Redux

- Developed and Optimized the frontend of drbwc.com using React, Redux, and Node.js for high performance supporting dynamic product listings, user interaction, and secure transactions.
- Built a responsive and scalable UI using SCSS with centralized variable management for consistent styling across devices.
- Used Redux Toolkit to manage global state efficiently, ensuring a predictable and maintainable architecture.
- Implemented core e-commerce features such as categorized product views, customer reviews, wishlist management, shopping cart, checkout flow, and user authentication.
- Integrated a dynamic navigation system with real-time structural updates through the admin dashboard.
- Improved performance and perceived load time using lazy loading and skeleton loaders, enhancing user experience during data fetches.
- Collaborated with cross-functional teams in Agile sprints to deliver scalable and production-ready features on time.

Zweler – Ultimate Jewellery Supply Hub

Tech Stack: HTML, CSS, Next.js, Tailwind, TypeScript, Laravel (Backend)

- Managed and enhanced a scalable multivendor e-commerce platform, ensuring smooth integration between the frontend and backend.
- Added responsive, modular UI components, improving the overall user experience for both vendors and customers.
- Resolved complex frontend issues, including product count discrepancies, pricing/quantity logic, and user role inconsistencies.
- Optimized the admin dashboard for seamless management of product variants-based price counting.
- Collaborated with the client teams to enhance performance and maintain data integrity.

Aries Holiday – Holiday Package Service Web App

Tech Stack: React, HTML5, CSS3, Bootstrap, Tailwind CSS

- Led frontend development of Aries holidays using React, Bootstrap, and Tailwind CSS.
- Created responsive, mobile-first layouts and intuitive UI to enhance user engagement.
- Translated design mock-ups into pixel-perfect components, optimizing performance and cross-browser compatibility.

Project Management Tool (PMT)

Tech Stack: React.js, Redux, React-Bootstrap, SCSS, HTML5, Laravel (Backend)

- Built **reusable and modular React components** to ensure scalability and maintainability.
- Used **Redux Toolkit** for global state management across tasks, projects, and user roles.
- Integrated dynamic data flow with **RESTful APIs** for seamless backend communication.
- Designed and implemented a custom interactive timeline chart to visualize project progress using Chart.js and Apex Charts.
- Applied SCSS for styling and React-Bootstrap grid system to ensure fully responsive layouts across devices.
- Troubleshoot and resolved **cross-browser compatibility** issues to deliver a consistent user experience.
- Collaborated in an Agile team environment, participating in sprints, stand-ups, and testing cycles.
